

eBizNET WMS on NetSuite Platform

eBizNET has developed a Warehouse Management System (WMS) on native NetSuite platform for those seeking advanced capabilities for warehousing and distribution operations. The award winning eBizNET® WMS is an integrated warehouse management solution, that will help NetSuite’s clients realize the full potential of their ERP investments. Our NetSuite-native WMS brings best-of-breed supply chain execution capabilities to NetSuite users in eCommerce, Wholesale & Distribution, and Manufacturing.

Smart businesses understand that controlling inventory, fulfillment and shipping costs is essential for success. Companies are constantly striving to improve their warehouse operations by increasing agility, visibility and labor efficiency. This requires use of best practices combined with sophisticated Warehouse Management System (WMS) that optimally manages all resources within the distribution operations while minimizing the total cost of operation or ownership (TCO).

eBizNET Warehouse Management System

eBizNET® WMS is a robust and scalable solution offered in multiple editions to cater to the needs of both small & large enterprises. The breadth of the functionality is designed to support various industry verticals including retail, hi-tech & electronics, automotive, healthcare, and 3PLs. The solution features and supports warehousing and industry best practices like:

- Mobile RF handheld devices with barcodes
- Directed putaway and picking
- Rules driven dynamic bin location & inventory allocation
- Wave planning and multi-order batch picking
- Containerization to pick directly into shipping containers
- Space management through optimum SKU allocation
- Task assignment and monitoring
- Fully integrated with FedEx and UPS
- Lot, FIFO, expiration and shelf life monitoring
- License plate and serial # tracking
- Value Added Services - kitting & de-kitting
- Cycle counting & inventory audit
- Dashboard with KPI and labor productivity reporting

“With NetSuite and eBizNET we can adjust supply-chain or inventory management priorities based on changes in customer orders. And we can give our customers real-time visibility into the status of their orders. All of these benefits reflect directly back to our differentiation in the market and to our bottom line success.”

Jad Daye, President,
