

CARGO & TERMINAL MANAGEMENT SYSTEM

INTRODUCTION

Port and terminal operators today recognize the need of better tools to track and manage large volumes of goods moving through ports and have robust and scalable solutions to solve their challenges of congestion, cost of operations and damages.

Today, operators need smart CTMSs that bring visible changes in the port & terminal operations through effective data management of data, inventory control, increased throughput, efficiency in location and resource allocation, all the while reducing cycle time and paperwork.

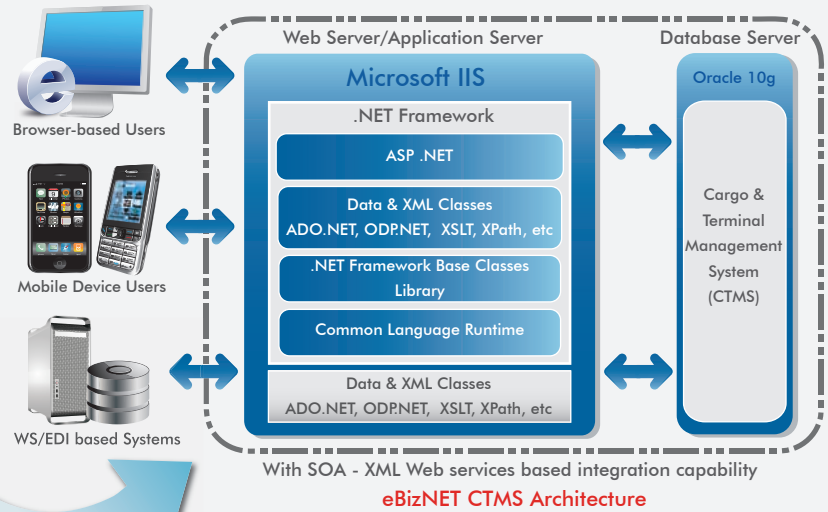

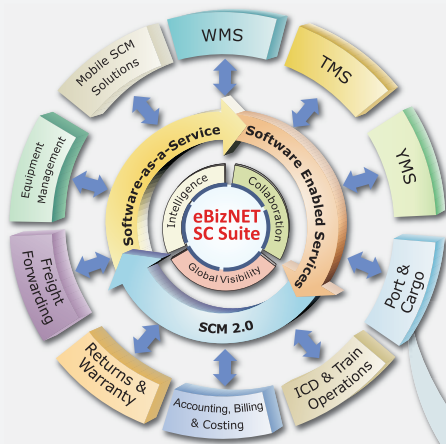

eBizNET CARGO & TERMINAL MANAGEMENT SYSTEM

eBizNET CTMS is a web based application that provides a single window for global visibility and precision in the port operations thus enabling improved tracking, complete access and control over the supply chain. The highly configurable and robust solution can work easily in a multi-site and multi-company environment.

eBizNET CTMS facilitates the exchange of information directly from shippers, carriers and agents, and supports stevedoring operations, task based billing, asset management, and yard management. Other key features of the solution include:

- Supports multi-modal logistic operations (Rail/Road/Sea)
- Supports Terminal Operations and Yard Management in the ports/container depots
- Container and Equipment tracking
- Unique ID for trading/shipping agents
- User-defined attributes for imported and exported goods
- Centralized management and upgrade of all remote terminals
- Enhanced data security through location specific information
- Data exchange capability with external systems via standard EDI formats including XML
- Creation of roles for users thereby improving data security and preventing unauthorized access
- Value added services like container stripping and stuffing, cargo handling and storage
- RFID technology enabled

BENEFITS

- Increased efficiencies in cargo and container terminal operations
- Ability to track the movement of containers and goods within a port
- Enhanced & optimized equipment utilization
- Automation of business processes leading to increased cost savings in operations
- Enhanced and extensive management reporting to analyze, predict & decide on business scenario accordingly
- Seamless integration with all the stakeholders / external systems for enhanced cargo visibility
- Efficient cargo management throughout the life of the goods in the port / terminal

ADVANTAGE eBizNET

eBizNET CTMS complies with the market needs by providing flexible On – Demand and On – Premise deployment options along with unique pricing models that ensure business value to the customer.

eBizNET CTMS enables complete access and control of the supply chain by means of a single window to consolidate operations thus ensuring supply chain visibility. With extensive MIS reporting capability, the customer is empowered to closely monitor operations and take real-time decisions ensuring high efficiency.

ABOUT eBizNET™ SOLUTIONS

eBizNET Solutions is a leading provider of Supply Chain Execution Solutions and has its presence in North America and Asia Pacific. With a proven footprint across Retail, 3PL, Automotives, Pharma, Food & Beverages and High Technology, the company offers an array of unique solutions as part of its robust and integrated eBizNET – Supply Chain Suite in a SaaS or On-Demand environment for supply chain communities, supporting all the trading partners in the ecosystem.
